Red Cross aid reaches Zahle

EIRUT, April 17 (Agencies) - The International Red Cross got e first food supply convoy past an 18-day Syrian tank siege into the istern Lebanese city of Zahle today.

in work

Most of the city's 150,000 inhabitants stayed indoors as 36 tonnes flour, dry milk and other foodstuffs were unloaded from a convov four mini-trucks in the beleaguered city, residents reported by

They said they could not venture out as volleys of shellfire echoed om surrounding hills where Syrian forces were seen by reporters ghtening a noose around Zahle's outgunned rightist militia gar-

Syrian peacekeeping forces and militia positions of the Falangist arty, Lebanon's largest rightist group, traded rocket-propelled greades and gunfire across Beirut's mid-city "Green Line" in sporadic rid-morning and mid-afternoon violations of a 10-day-old ceasere. Police here said there were no casualty reports.

In southern Lebanon, meanwhile, provincial authorities said an iraeli force crossed the border, entered the U.N.-controlled village

Road pacts signed for JD 30 million

Special to the Jordan Times

AMMAN, April 17 - Three contracts worth about JD 30 million were signed here vesterday to build a four-lane divided highway from a point 40 kilometres south of Amman to Ma'an on the road to Aqaba and to construct a two-lane highway from a point just south of Amman to Azraq, along the route to Baghdad.

Traffic from Aqaba to Amman and transit traffic to Iraq and Saudi Arabia, which will be using the new roads, are already more than the existing Desert Highway was meant to handle. Imports through the Red Sea port will be increasing in view of Jordan's ambitious development plans, and the Iraq-Iran war has been responsible for a dramatic increase in the volume of goods going through the free zone in Aqaba. The port is being expanded and work on the overland routes is meant to cope with these developments.

The Ministry of Public Works awarded the first contract, worth JD 8.8 million, for the Juweideh-Sahab-Muwaqqar-Azraq highway, to the Yugoslav firm Partizanski Put, Mr. Abdullah Haddad, director of roads at the ministry, told the Jordan Times yesterday.

This 87-kilometre road will link the Desert Highway with roads leading to Iraq and Saudi Arabia while bypassing Amman. It will also serve the new industrial estate being set up at Sahab, southeast of Amman, joining it to Amman and major roads leading to Aqaba, Syria, Iraq and the Gulf. The highway should be finished within 750 days of the time that

(Continued on page 2)

of Yater and blew up three houses whose tenants were suspected of collaborating with Palestinian commandos.

But Israel denied the claim and said the house-destroying raid might have been staged by Israeli-backed rightist militiamen of re negade Lebanese army Maj. Saad Haddad, who controls a narrow enclave along Israel's northern border in southernmost Lebanon.

The governor's office in Sidon, provincial capital of southern Lebanon, said one Lebanese tenant was injured in the Yater blasts. The village is controlled by the Dutch contingent of the U.N. Interim Force in Lebanon (UNIFIL).

A U.N. spokesman in Tel Aviv said two Dutch troops were slightly injured by rock fragments from rightist militia fire. He gave no further details and it was unclear whether the Dutch soldiers were injured in the blast or in a separate incident.

The hostilities came as Dutch Foreign Minister Christoph van der Klaauw arrived in Damascus today and held talks with Palestine Liberation Organisation Chairman Yasser Arafat.

Dr. van der Klaauw, president of the European Economic Community (EEC) Council of Ministers, is sounding out Middle East leaders about their attitudes to an EEC peace initiative for the

He had talks with Lebanese Prime Minister Shafiq Al Wazzan this morning before leaving for Damascus, where Mr. Arafat is attending a meeting of the Palestinian National Council.

Lebanon's attention was focused mainly on Zahle, however. The Red Cross convoy rescued 24 schoolchildren between five and 11 years of age from the basement of their school where they have been stranded since the outbreak of the Syrian-Falangist hostilities on April 1.

The Syrians stopped shelling the city when a ceasefire was proc-laimed on April 8. But they demanded that some 700 Falangist militiamen leave the city as a precondition for lifting the siege.

Israeli troops inspect downed balloon. (AP wirephoto)

She arrives in Saudi Arabia tomorrow

Gulf security to lead Thatcher agenda

RIYADH, April 17 (R) — Defence of the Gulf and its oil fields will be one of the main concerns of Mrs. Margaret Thatcher when she arrives in Saudi Arabia on Sunday on the first visit by a British prime minister.

Mrs. Thatcher will also want to romote the 10-nation European conomic Community's Middle ast initiative calling for the alestine Liberation Organisation PLO) to be involved in setement negotiations with Israel. British businessmen hope she rill also keep in mind the \$1.9 illion British trade deficit with ne world's leading oil exporter. For Saudi Arabia's royal rulers nere will be another chance, foltwing a visit two weeks ago by J.S. Secretary of State Alexander laig, to press their view that the vrab-Israeli dispute rather than oviet policy is the chief threat to liddle East stability and the safe

ow of Gulf oil. Gulf newspapers reacted harply when Mrs. Thatcher cently pledged British paricipation in a U.S. Rapid Deployment Force proposed to eter Soviet or other threats to the julf oil fields.

In public statements Saudi leaders have shown little enthusiasm for that idea, suggesting the West should concentrate instead on persuading Israel to resolve the Palestinian issue and, in the Gulf itself, on helping regional powers to arm themselves.

Mrs. Thatcher has been clarifying her attitude, saying there is no question of sending in any force "if people did not wish it to go."

British businessmen hope the prime minister's visit will help their efforts to clinch contracts against tough competition from trade rivals including Japan and

Mrs. Thatcher comes here from India and will go on to visit the United Arab Emirates, Oman and Qatar where security and trade are also expected to be the key topics. (See story on page 8)

Saudi Arabia bought about \$2.5 billion worth of British goods in 1980, up 17.5 per cent in value

Margaret Thatcher

from 1979. The trade deficit was in a sense artificial, incurred by Britain buying heavy Saudi oil while selling its own premium North Sea crudes at higher prices elsewhere.

But British businessmen have been hampered by the strength of the pound and the showing on

Death of a Princess," purporting to dramatise the execution of a Saudi princess for adultery.

Saudi Arabia found this offensive and temporarily held up British contracts.

The British have lost out on car sales although they have held their own in the construction industry. Saudi Arabia plans to spend at least \$100 billion on defence between now and 1985.

In the 1960s Britain supplied it with an air defence system but now it relies chiefly on the United States for military equipment, with France building warships and training Saudi personnel and a possible West German tank sale in

the offing. Like Queen Elizabeth, who in 1979 was the first reigning British monarch to visit Saudi Arabia, Mrs. Thatcher is coming to a land where custom dictates that women

be veiled and secluded. When she arrived the Queen wore a dark ankle-length gown with a slip of fabric flowing from her hat that hinted at a veil.

British officials said Mrs. Thatcher would "cover up" but probably not to the same extent--her visit does not have the sumbolism of a state occasion.

Moheisen beaten by captors, doctors' report indicates

AMMAN, April 17 (J.T.) — Jordanian diplomat Hisham Al Moheisen, who returned to Amman yesterday after over two months in his kidnappers' hands, shows signs of having been beaten during his captivity, according to a medical report issued today.

Examination by doctors at the King Hussein Medical Centre has revealed that Mr. Moheisen bears fresh wounds on the soles of both feet and also suffers from general weakness, exhaustion and high blood pressure.

The doctors found a wound of nine by five centimetres on the sole. of the diplomat's left foot and other wounds on the right foot as well, according to the report. Mr. Moheisen lost three kilogrammes during his confinement, the doctors found.

His Majesty King Hussein, who is in Britain on a private visit, telephoned His Royal Highness Crown Prince Hassan the Regent last night to enquire about Mr. Moheisen's health. Mr. Moheisen requires a month of rest and recuperation under

medical supervision, according to the doctors' report. Mr. Moheisen, the Jordanian charge d'affaires in Lebanon, was kidnapped from his Beirut apartment on Feb. 6 by gunmen who raided his home at dawn, killing three persons during the attack. He was released Wednesday by the National Confrontation Front, a pro-Syrian Lebanese group, into Syrian custody in the Lebanese town of Shtoura. He was later taken to Damascus before his return to

Mr. Moheisen was welcomed by Prime Minister Mudar Badran. chief of the royal court Ahmad Al Lawzi and other senior officials upon arriving at the medical centre last night.

After welcoming Mr. Moheisen, the prime minister gave directives for Mr. Moheisen's care.

For his part, Mr. Moheisen expressed his delight at being freed and back in his country and amongst his family and friends. He expressed his gratitude to King Hussein and the Jordanian government for their efforts to bring about his safe release and return home.

The diplomat was examined by the medical centre doctors after his arrival yesterday afternoon from Damascus at the border town of Ramtha, where he was greeted by large, cheering crowds and a delegation of Jordanian officials led by Foreign Minister Marwan Al

Mr. Moheisen told newsmen that soon after his release from detention in Lebanon he was taken to Syria by the mostly-Syrian Arab Deterrent Force and was told that President Hafez Al Assad had played a key role in securing his release. Mr. Moheisen was told to meet with President Assad and express his gratitude for his efforts.

Hisham Al Moheisen embraces his wife Uruba after his arrival in Jordan yesterday from over two months of captivity.

U.S. reportedly willing to sell Saudis 10,000 anti-tank missiles, radar bases

WASHINGTON, April 17 (A. The administration of U.S. President Ronald Reagan has decided to sell Saudi Arabia ground radar stations and 10,000 more anti-tank missiles in a concerted effort to build the kingdom into an anti-Soviet bulwark, sources say.

That's enough missiles "to knock out every tank in the Russian arsenal, certainly all the tanks Israel has," a highly placed source said with some exaggeration. Actually, the Pentagon estimates the Soviets have about 45,000 tanks and the Israelis about 3,000.

The size of the up-to-now secret sale, along with another secret plan to provide Saudi Arabia with a dozen highly sensitive ground radar stations for controlling interceptor planes, surprised diplomatic and other seasoned observers.

"Maybe they want to use some for target practice," one source commented wryly. Although arms requests are frequently scaled down, the Saudis are to get all the wire-guided anti-tank weapons they asked for. They already have 4,000.

When the army asked why the Saudis needed so many more, according to one source who asked not to be identified, the Saudis said one reason was "they wanted to shoot some up for training." The administration's arming of Saudi Arabia is designed to stem

Soviet adventurism toward the Gulf, but it has worried Israel. But administration defence planners demur, saying the arms sales

Israelis on lookout after balloon attack

TEL AVIV, April 17 (Agencies) - Israel's military chief of staff warned today in newspaper interviews that Israel should expect more attempts by Palestinian commandos to get into Israel by air.

Lt. Gen. Rafael Eitan said be was not surprised by yesterday's flight of two commandos in a hot-air balloon, who were shot down and killed by Israeli gunners in the northern border zone.

Meanwhile, the military command said today that Israel had increased its anti-aircraft units along the border, following recent commando attempts to infiltrate by balloon or motorised hang-

Israeli military experts, including Deputy Defence Minister Mordechai Zippori, have said that Palestinian commandos are now attempting to establish some form of air force as Israel fortifies its land and sea entries with barbed wire, alarms and regular patrols. "The terrorists are likely to try other types of aerial infiltrations that they haven't tried before," Gen. Eitan said today.

The Israeli military command said anti-aircraft gunners shot down the balloon as it drifted into the border area. It plunged to the ground inside Lebanon, and although the two commandos survived the crash they dieft a short while later in a firefight with Israeli troops

on rocky terrain, the command said. The military said the commandos had maps, leaflets, 10 grenades and three submachine guns, one of them equipped with an anti-tank grenade launcher.

A U.N. spokesman said peacekeeping forces sighted the balloon and estimated that it had flown eastward from the Lebanese Mediter-

He said the Israelis were seen sending up flares at about 4 a.m. (0200 GMT) to locate the balloon. Last July a Palestinian commando balloon crashed in southern

Lebanon, according to U.N. forces who found the wreckage. On March 7 two guerrillas tried to enter Israel on motorised hang-gliders. One was caught by pro-Israeli rightist forces in southern Lebanon while the other was captured after landing in Israel. The Palestine Liberation Front yesterday claimed responsibility

for the balloon infiltration attempt.

A communique issued by the PLF in Damascus said the operation represented an "escalation of the armed struggle of the Palestinian

revolution against the Zionist enemy in Palestine "It does not matter at all to us if two of our fighters should suffer material losses as it matters that the military and civil security of the enemy should be shaken in face of the Palestinian fighters' determination," PLF spokesman Abul Abbas said.

He identified the occupants of the balloon as Mr. Omar Ahmad Obeid, 19, of Safad, and Mr. Musa Mohammad Khalil, 18, of Hebron in the occupied West Bank of Jordan.

are part of the new U.S. strategy to build up its allies in the Gulf as a shield against the Soviets. The deal to supply the anti-tank missiles was put together even

while opposition grew in Congress to two other arms sales to the One would deliver, beginning in 1985, five of the vorld's best radar command planes. The other would enhance the range and

firepower of the U.S. F-15 jets, among the best fighters in the skies, which the Saudis will have beginning next year. Almost 50 senators and 100 House members have expressed concern over the proposed sales, raising such issues as a threat to Israel and the danger of U.S. technology being taken over by

Several members of Congress have become more irritated because the administration has failed to answer their questions for the past two months about how the deal would affect the arms balance in the

Middle East. It has been learned, meanwhile, that Secretary of State Alexander Haig and several other key officials are arguing for an arms sale

Mr. Haig pushed hard for deferring the decision on the sophisticated Airborne Warning and Control System (AWACS) radar planes but lost out in an argument with the air force, several sources told the Associated Press.

Some officials wanted to hold the Saudis to the less-advanced Hawkeye system used by Israel. As it is, sources said, some complicated electronic gear will not be transferred to the Saudis with the

Americans will be sent to Saudi Arabia to help fly and maintain the planes and will retain control of any highly technical decoding equipment, officials said.

According to Middle East Policy Survey, a newsletter which has disclosed some aspects of the Saudi weapons deals, \$600 million in compensating U.S. aid to Israel, which was to be offered as a loan, will be converted into a straight grant. A congressional source who asked not to be identified said withholding some electronics in no way reduces the effect of the AWACS planes. By scanning the skies' for hundreds of kilometres, the radar planes give the F-15 interceptors and other Saudi jets a much better chance of shooting down

enemy planes. Besides, the source said, by letting it be known that the Saudis will not get some electronic equipment, the administration could be trying to woo potential opponents into supporting the sale.

SOVIET BOOK EXHIBITION

At The University of Jordan Library

British jurist on Islam's part in humanitarian law

By Mohammad Ayish Special to the Jordan Times

AMMAN, April 17 — For some foreign participants, the recent Middle East seminar on international bumanitarian law was a "further step towards laying down the basis of that law and bringing it into effect;" but for others the gathering was also an opportunity to learn more about the essence of humanitarian law in the Middle East -- that is, Islam.

"The seminar on international humanitarian law was an education for us as westerners, and it gave us the chance to learn many things about Islam," Professor Emeritus Gerald Draper of the University of Sussex, who took part in the eight-day gathering which concluded here last Sunday, told the Jordan Times.

"Although the main purpose was to promote humanitarian law in this part of the world (the Middle East), I have also been able to fare." Prof. Draper said. He added. added that such humanitarian conduct was clearly manifest in the holy Koran, the Hadith Sharif (the Prophet's speeches). the words of the Muslim caliphs -especially Abu Bakr -- and the writings of several learned Muslim

writers.

"It appears that many of the principles included in the Geneva Convention of 1949 and the supplementary protocols were to be found in the Islamic Sharra some 13 centuries ago," Prof. Draper said. This should make it easier for Arab Red Crescent societies to promote the principles of modern humanitarian law, and for Arab governments to ratify the two Geneva protocols pertaining to treatment of civilians in time of war, according to the retired law

The two protocols have so far been ratified only by Jordan and Tunisia, though they were signed by all Arab states.

Prof. Draper said the protocols seek to control the conduct of the armed forces in regard to civilian targets. "They also determine which targets are lawful and which are not, in order to spare the civilian population from the effects of conventional weapons," he said.

He added that while the first protocol deals with international armed conflicts, the second one regulates treatment of civilians during internal armed strife. But since in the latter case the area of conflict is within a sovereign state, it is harder to work within the framework of the second Geneva protocol: as each state controls every aspect of life in its territory, according to Prof. Draper.

But while Prof. Draper sees a unique importance in injecting Islamic principles into inter-national humanitarian law, he believes that such principles will be more effective in the Arab and Islamic countries.

"In theory, international humanitarian law is universal, as it imposes self-restraint on belligerent actions," he said. "But each area has its religion, traditions and costumes; and all these

lead to different interpretations of the conduct of war.

Prof. Draper cited an example of the "pluralistic" interpretation of humanitarian law: the Israeli occupation of Arab lands. "Israel claims that the Fourth Geneva Convention dealing with belligerent actions does not apply to the occupied Arab lands, since according to its interpretation the West Bank and Gaza Strip had no sovereign state controlling them before 1967," he said. This argulearn the amazing contributions of ment has been rejected by the Islamic Shari'a, the humanitarian international community in a conduct of Muslim soldiers in war-series of resolutions since 1967, he

"But despite that international rejection. Israel has continued to violate the Geneva Conventions by embarking on a policy of acquisition of Arab land, transfer of waqf property to Israeli ownership and deportation of Arab citizens from the occupied Arab

On the recommendations of the first Middle East Seminar on International Humanitarian Law.

Prof. Draper said that the participants established the need to disseminate the principles of what that international humanitarian law among the young. Thus, "those generations would be psychologically responsive in times of violations of humanitarian principles," he said. But he added that there is still a long way to go to

of Startiller and

and obligation as a

A company

er international distance is

. . .

achieve that end. He also said that with Islam as the basis for humanitarian conduct, the Arab states would be able to promote the principle of the late to be able to humanitarion law in their ter- win there well- we ritory. He gave as an example the and the interest humanitarian conduct of Sakada during the Crusades, contrasting it this contrast the contrast to the to that of Richard the Lionhearted.

Prof. Draper worked as a lawyer before the Second Viorid War and when the war broke out. he joined the Irish Guards, a British army unit, serving in North Africa and Europe. At the end of the war. Prof. Draper was transferred to the legal service of the British army, and joined the German war crimes prosecution boards, on which he remained for four years.

In 1956, he quit the military legal service and taught international law and the history or law at the University of London. In 1967, he moved to the University of Sussex, where he taught law for 12 years.

Prof. Draper has attended similar gatherings on international humanitarian law in Europe. Southeast Asia and South America. He attended the First Middle East Seminar on International Humanitarian Law upon the invitation of His Royal Highness Crown Prince Hassan.

Unions' statement marks Palestinian Prisoner Day

AMMAN, April 17 (Petra) - The Jordanian professional unions last night issued a statement on the occasion of Palestinian Prisoner

The occasion is to draw we rid attention to the sufferings and torture of Palestinians in forces juils, the statement said. It paid tribute to the stead from section the Palestinian people under I hadi rule, and their struggle to achieve friedom.

The statement dies the attention of the sold some or Israeli practices in the occupied Arab termodics, and urgent the national humanitarian organisations to intervene and pur an end to Israel's barbaric treatment of Arab detainees.

The statement also called on Arab states to render further support to the Arab population and give material and moral assistance to the families of the almost 4 (50 Arabs in Israeli jails.

national news briefs

AQABA, April 17 (Petra) - The Agaba city funtball least defeated Wihdat in a match here today. At the end of the match the governor of Aqaba District awarded the trophy to his city's victorious team.

AMMAN, April 17 (Petra) - Seven Jordanian merchanis have been fined JD 50 to JD 100 by the military court for visiting Supply Ministry regulations. One of the merchants, Salem Hajazawi will also have his store closed for two weeks. The sentences were endorsed by the military governor yesterday

AMMAN, April 17 (Petra) - The minister of labour, Dr. jango Al Anani, yesterday visited three factories, the Jordanian tile: factory the Rafia's plastic factory, and the Petra aluminium products factory. The minister was briefed on the nature of these factories' work, pay policies and safety and sanitary conditions.

IRBID, April 17 (Petra) - The Ministry of Municipal and Rurai Affairs and the Environment has approved JD 79,000 budget of 'Irjan Municipality in Ajloun District, J.D. 30,000 of the budget is allocated for building an elementary school, for which eight dunums have been purchased, ministry spokesman said.

SUNDAY, April 26: Easter Day will be celebrated as follows:

6 a.m. Sunrise Service at Jerash 8 a.m. Holy Communion

12 noon Holy Communion 4:30 p.m. Family Service with Holy Communion.

Exhibition opens today

Jordanian architecture on show

Special to the Jordan Times

AMMAN, April 17 — In an attempt to promote the work of contemporary Jordanian architects, a week-long exhibition of their projects will be Professional Associations Complex in Shmeisani.

This first-of-its-kind exhibition is a sort of architectural display, whose stated purpose is "to acquaint the public with new trends in architecture and graphics

الاسبوع المعمارب

Poster publicising the architects' exhibition this week, featuring a

contemporary Arabic design for a housing complex.

Many Jordanian architects have acquired fame both in and outside Jordan through their ingenious designs and projects. Now, about

۱۸ـ۲ نیسان

معمهالنقابات

500 Jordanian architects are registered at the Engineering Association, of whom 300 are now actually working in Jordan. The others work in neighbouring or foreign countries.

Construction has boomed in Jordan during the last 10 years, and Jordanian architects have excelled in providing original designs... as many buildings scattered around Amman and its suburbs can testify.

However, many architects are still unknown, and famous names have taken most of the credit. The exhibition is an effort to rectify this situation by featuring the work both of established and of lesser-known architects.

Besides the projects of wellestablished architects, the exhibition will include the graduation projects of last year's architecture students at the University of Jor-

"The exhibition is also a means of presenting our architects' potential," Mr. Bilal Hammad, an architect and one of the exhibition's organisers, told the Jordan Times. The organisers were chosen by the architecture chapter of the Engineering Association. They are Mr. Tareq Bushnaq, Mr. Shamseddin Al Khalidi, Mr. Maher Al Nammari and Miss Soud Al Amiri.

The exhibition will not only present models of buildings, but will also illustrate some attempts at landscaping -- an art not seen in A special edition of The Jor-

danian Engineer magazine with special emphasis on architecture will be issued and distributed to mark the occasion, and posters have been plastered all over architectural firms' and offices' buildings as well as government institutions.

The posters, with their impressive graphics, embody the message of the week. Mr. Hammad, their designer, said "The posters represent our mode of thought for the future."

The poster's design features a complex of homes in a modern Arab style. "The current trend in construction is to build separate villas, which take lots of space, we have to start with (compact) housing units," Mr. Hammad said.

A festival air surrounds the preparations for the week of the exhibition, and many architects are clearly thrilled. They will be given by renowned professors from the University of Jordan and other architects.

The projects in the exhibition will be illustrated by photographs, to make them understandable to the layman. Since the exhibition area is small, only a small number of projects will be featured. "This is good because people will appreciate the artwork of each separate design," Mr. Hammad said. The exhibition is open to the public all day from April 18 through April 24.

Folicing the Middle East

CONTINUE TO STREET ANNOUNCEMENT that it is con-Factory taking part in an international force to be sent to the Sinai Desert next year to supervise Israel's final with-I would from the area, as stipulated in the Camp David manager indicates the United States' determination to recurre the role of "policeman" in the Middle East. It is give hoped that active U.S. participation in the force will and a momentum to efforts aiming at ending "Phase I" of Camp David framework, dealing with the norprepare the ground for its "policeman" role, the

-agan administration sent Secretary of State Alexander to be Tel Aviv earlier this month with a bagful of new Spandel and military aid pledges to compensate Israel for the disadvantages in the region's military balance the issue is see resulting from U.S. arms supplies to Saudi Annalia, Mr. Haig's proposed military package includes the Publishibility of Israeli airbases in Sinai becoming American ster the Israeli pullout next year. Indications are that Egypt and Israel have approved the move.

The arrival of U.S. marines in Sinai in April 1982 cannot the seas in isolation from the presence in the Arabian Sea of more than 30 vessels (including the aircraft carriers Midand Eisenhower), or from continuous American exercircs in desert warfare, or from recent U.S. overtures to

Fairt. Oman and Somalia. this indicates that the United States wants to take matters into its own hands and assume the role once played the Shah of Iran in the region.

BUSINESS HORIZON

Economic planning and real market forces

By Fahed Fane

THE economic development planner sometimes thinks that he is able to shape or re-shape the structure of the national economy to suit the theoretical picture he has in mind. If this is at all possible in a state where government absolutely controls all human and material resources, it is rather impossible in a country that applies a free enterprise system, which interacts freely with market forces.

All efforts exerted through pervious economic development plans in Jordan to swim against the stream of the national economy have been doomed to failure and

waste of resources, while their struction being classified i best investments that paid off have been those in which Jordan enjoys a special relative advantage, especially when the Jordanian economy is so open to the outside world as no other national economy has been. The value of goods and services imported and exported is close to double the value of the entire national domestic product.

The main target of the previous five-year plan (1976-1980) was to boast the share of commodity production from 34.1 to 44.1 per cent of GNP. However, it could not exceed 38.8 per cent.

The previous plan devoted 57 per cent of its investments to the commodity sector, which contributes one third of the GNP, while it gave only 43 per cent of its investments to develop the services sectors which contribute two creation of certain manufactur thirds of the GNP. The bias in firms that are a burden or para favour of commodities vis-a-vis on the national economy, and services was 2.5 times, yet services survive only through custo managed to maintain their major share in the national economy.

The very slight increase in the share of commodity production during the previous five years from 34.1 to 38.8 per cent of GNP did not materialise -- as the plan aimed -- through an annual growth at 26.2 per cent of the industrial sector. As a matter of fact industry grew at only half the unrealistic targeted rate. It was the construction sector that flourished in response to market demand, and grew at three times the targeted rate, thus making up for part of the deficiency in industrial and agricultural products -- conplans as commodity sector. What we are trying to say is if the Jordanian down to-c realities call for a fast grow

the construction sector, it w not be wise for the plan to otherwise . Otherwise the struction sector will surpris planners by its self-im momentum, as has happy when the construction activ able to attract 21 per cent a actual investments during the five years against the plan per cent. However, the new admits that the country is still fering from an accumulated in ficiency of houses.

Jordan does not have any r tive advantage in the area of m ufacturing. Therefore if the 1 plan persisted in over-suppor this sector, the result would be exemptions and direct or indir subsidies by the government, consumers, or both.

Jordan does have an advant

in the field of services that needed by the entire oil-Arab area, and the plan therei should not ignore this fact miss the apportunity of a feas investment.

The fact that industry achie only half the targeted rate growth, and that construct achieved three times the targe rate of growth, is an obvious ille ration of the sometimes wide between our economic plan and the real market forces.

ARAB PRESS COMMENTARY

AL RA'I: The Arab people in general, and the Palestinian people in particular, observe Palestinian Prisoner Day today--an occasion that symbolises the jailed and tortured Palestinians and their sufferings at the hands of the Israeli authorities and also their determination to carry on the struggle and continue their stead-

This day serves as a reminder to the Arab countries that they should transcend their differences, join their ranks and rebuild bridges of cooperation and solidarity for the salvation of the Palestinian people, who suffer from oppression under the yoke of

Furthermore, this day should prod the Arabs to follow up the case of the Palestinian people at international forums, and work to making this an international occasion, so that the world community can remember its human, moral and political responsibility towards the jailed Palestinians whose sole crime was to exercise their right to resist occupation-a legitimate right supported by international agreements.

The world should realise that these prisoners are not mere

terrorists, as they are said to be by the Zionist aggressors, but are, in fact, oppressed nationalists trying to liberate their homeland.

AL DUSTOUR: Israeli Prime Minister Menachem Begin's reassertion in the past two days that he will continue to give military assistance to the Lebanese rightist militia, and threats by his Deputy Defence Minister Mordechai Zippori to continue strikes against Palestinian positions in Lebanon, come as no surprise to

These statements are aimed at escalating tension in the region and diverting the world's attention from Israel's policy of establishing settlements in the occupied Arab territories.

These threats are no mere coincidence either, coming at this particular time, as the president of the European Council of Ministers Dr. Christoph van der Klaauw, starts another tour of the Middle East to try to formulate the EEC's initiative to end the Arab-Israeli conflict.

It now seems that Tel Aviv expects to face pressure from international circles, soon after the coming Israeli elections, to force it to change its attitude vis a vis a just and comprehensive Middle East peace.

Despite their current differences, Arab countries must adopt a unified position and help the Europeans work out a comprehensive formula that would ensure the restoration of Pales-

FORECAST FOR SATURDAY, APR. 18, 1981

YOUR DAILY from the Carroll Righter Institute

GENERAL TENDENCIES: This is a good day to look over your surroundings and make plans for improvement. Devise quicker ways to handle chores. You have a good: chance to gain greater success now.

ARIES (Mar. 21 to Apr. 19) Make plans to gain your finest aims. Find out what close ties expect of you. Keep poised and serene at all times. TAURUS (Apr. 20 to May 20) You can now develop

good ideas by studying events in newspapers and magazines. Use tact in a communication. GEMINI (May 21 to June 21) Express your talents to

one in authority. Showing increased affection for loved one brings excellent response. MOON CHILDREN (June 22 to July 21) Take steps to

cooperate more with close ties. Study new project that could bring greater success. LEO (July 22 to Aug. 21) There is much work ahead of you so waste no time in accomplishing your tasks. Avoid

one who is always asking for favors. VIRGO (Aug. 22 to Sept. 22) Stay within your budget if

you go out for amusement or you will regret it later. Follow advice of experts.

LIBRA (Sept. 23 to Oct. 22) Handle routine chores early in the day so you'll have time for recreation later. Be more outgoing at a group affair. SCORPIO (Oct. 23 to Nov. 21) Good day to study your

monetary position and figure out a sensible way to insprove it. Take it easy tonight. SAGITTARIUS (Nov. 22 to Dec. 21) Make needed changes in your surroundings and improve the quality of

your life. Make this a most productive day. CAPRICORN (Dec. 22 to Jan. 20) Making plans early in the day to gain your personal goals is wise. Take time

tonight for proper recreation. AQUARIUS (Jan. 21 to Feb. 19) A good day to engage in recreational activities that appeal to you. Show more affection to family members.

PISCES (Feb. 20 to Mar. 20) Plan how to make your future brighter. Listen to what co-workers have to sug-

gest. Strive for more happiness. IF YOUR CHILD IS BORN TODAY ... he or she will be one of those brilliant young persons who can communicate well with others. Teach to handle money wisely and to be more considerate of others. Don't neglect religious training early in life.

"The Stars impel, they do not compel." What you make of your life is largely up to you!

Contributions of Arab civilisation

By David R. Francis

9th-century mosque, Yairouan, Tunisia

/ASHINGTON, D.C. — To the istory-conscious Arab businesscan, his new oil-sourced wealth and financial power in the world

re a rebirth of former glory. During the seventh and eighth enturies, the Arabs launched an mpire that held sway from the yrenees on the border of France . compared or competed with the classical and Hellenistic heritage of the lands they overran.

The distinctive and richly hued civilisation that characterised the Muslim World at its height was formed in situ." It came into being within the new state, giving identity and character to the new order that resulted from the conquests of Islam as it spread among alien

The mugaradah in Islamic law is a contract in which one individual entrusts capital to a merchant for investment in trade in order to receive a share in the profits. The investor bears all the financial risks, the managing party risks his labour.

the Pamirs in central Asia. est, the Islamic imperial realm ivalled that of Rome at its peak. Writes John S. Badeau, a scho-

ar and a former U.S. Ambassador o Egypt, referring to the for-428. E Liation of the Arab empire: "The Arab conquerors came with mpressive military strength, but he culture of their desert home as simple and unsophisticated. othing in their culture, not even heir language at the beginning.

"Its major components were at tretching 4,500 kms from east to hand within the varied life and traditions of the subjugated people - classical literature, Hellenistic thought, Byzantine institutions, Roman law. Syriac scho-

Jarship, Persian art." Professor emeritus Badeau goes on: "At first, these resources were appropriated directly, with little reshaping. Before long, however. they were more selectively untilised, combined into novel patterns that served as both resource and

Arab empire at greatest extent, 700-850 A.D. Mediterranean Sea Peninsula **ARAB EMPIRE**

stimulus to creative Muslim scho-

"The result was not simply a montage of bits and pieces of disparate culture. It was a new creation with its own distinctive pattern, infused with a new spirit and expressing a new social order."

Mr. Badeau is one of almost a dozen contributors to a lavish coffee-table-type volume entitled The Genius of Arab Civilisation, Source of Renaissance."

The book goes into Arab contributions to literature, philosophy, history, architecture, art, mathematics, science, biology, medicine and mechanical technology. Many may recall a history course that dealt with the major influence Arab civilisation had on the Renaissance in Europe in these cultural fields.

Perhaps less familiar is the place of trade and commerce in the Arab empire and its subsequent impact on Europe. It is shown in language.

For instance, the word "check" ("cheque"in English) comes from the Arabic 'sak'. By advancing the concept of the bill of exchange --- the Arabs made the financing of commerce more flex-

Other words reflecting the lasting Arab influence include: traffic (Arabic 'usfriq', meaning "distribution"), tariff 'ta'rifah). magazine ('makhazin' as in French 'magazin', meaning "store"), almanac, average, calibre, coffee, cipher, nadir, zenith, zero and risk.

Some of these words can be traced to a Latin, Greek or Persian source. But they passed into European tongues through Arabic. The word "sterling", for example, has an ancient Greek base. However, it was transmitted into English through Arabic.

Ragaei and Dorothea El Mallakh note some of the Arab influences on European civilisation in a chapter on "Trade and Commerce" in the New York University Press volume. Ragaei is Chairman of the African and Middle East Studies Department at the University of Colorado and Dorothea does research on the Middle East.

One such contribution is the development of joint-stock com-panies, arrived at through the partnership of Muslim and Christian Italian merchants.

"Another significant Arabic contribution to European commercial development," the pair writes, "was expounded as early as the end of the ninth century in Damascus by Abu Al Fadi Ja'far Bin Ali Al Dimashqi in his work "A guide to the Merits of Commerce and to Recognition of Both Fine and Defective Merchandise and the Swindles of Those Who Deal Dishonestly".

There are three kinds of merchants: he who travels, he who stocks: he who exports. Their trade is carried out in three ways: cash sale with a time limit for delivery, purchase on credit with payment by installment and muqaradah."

The muqaradah in Islamic the two explain, "is a contract in which one individual entrusts capital to a merchant for investment in trade in order to receive a share in the profits. The investor bears all the financial risks; the managing party risks his

"The concept of muqaradah was certainly a precedent for the commenda, a legal, commercial device largely responsible for the expansion of medieval trade... It served as a crucial instrument by which capital could be pooled and investor and manager could be brought together in an enter-

Concerned with the movement of goods to markets throughout such a vast realm, the merchants of the Arab empire made advances in the fields of geography, navigation and shipbuilding. Among these was probably the compass. Another was the lateen sail, which enabled

The principle of the lateen sail was taken over and developed by European shipbuilders, especially tries. by the Spanish and Portuguese between 1440 and 1490, the El Mallakhs write. Many maritime words of Arab origin dot the English language: admiral, bar, barkentine, cable, sloop and monsoon, for instance.

pean nations and their colonies or the trade patterns that currently exist between the industrialised and the underdeveloped coun-

"The lasting Islamic impact on Europe did not result from the military confrontations of the Crusades but rather from the long years of Arab rule in Spain and Sicily. Through the innovations brought to these areas, new goods,

The distinctive and richly hued civilisation that characterised the Muslim World at its height was formed in situ. It came into being within the new state, giving identity and character to the new order that resulted from the conquests of Islam as it spread among alien peoples.

Summarising, the pair conprocesses, technology and conclude: "From the 8th to the early cepts were introduced into a and islam consisted chiefly of the exchange of raw materials from Europe (wood, iron, furs, slaves) for manufactured products and luxury agricultural items, such as spices, from the Arab empire.

"This pattern, it has been suggested, somewhat resembles the "colonial" trade of the 19th and 20th centuries between Euro-

12th century, the trade between Europe that was far less world of Islam. "That the debt of Europe and

Western culture to Islam has been largely forgotten is evidence of how fully assimilated the Arab influence has been in the Western world. The Islamic contribution has become part and parcel of its heritage." (Christian Science

Costly awakening from dreams of steel

By Michael Holman

LUSAKA: The TIKA iron and steel project in north-western Zambia is an object lesson in how not to go about development, according to experts. The lesson is likely to cost the country over \$71 million.

Zambia is belatedly and painfully counting the consequences of an abortive iron and steel project likely to cost the nation over \$71 million.

"In the experts' opinion there has never before been a comparable project in the world with such an accumulation of negative factors," is the conclusion of a post-mortem by Korf Engineering of West Germany.

The only return for the outlay, mainly in foreign exchange, is a cluster of buildings in a remote comer of the country and specially commissioned plant in the U.S. and Europe with little more than scrap value.

Zambia has already paid out

kwacha 19 million (\$23 million) between 1973 and 1976. But it must find over kwacha 40 million (\$48 million) to meet equipment costs, loan servicing plus interest. and storage charges, Mr. Mufuya Mumbuna, the minister of mines. told parliament last month. Zambia is already financially exhausted after years of low

copper prices. It owes some kwacha 500 million in payments for imports and remittances of profits and dividends, and desperately awaits the conclusion of negotiations with the International Monetary Fund for over Special Drawing Rights 500 million (\$613 million) to salvage an economy dependent on copper and cobalt for 95 per steel plant at Chisasa, a remote cent of its export earnings.

There has been disquiet about the Technical Industrial Kalumbila Associate (TIKA) steel plant since its inception. But details started to emerge only last month under pressure from parliamentary backbenchers, when Mr. Mumbuna asked MPs to approve Kwacha 2 million to meet some of TIKA's more pressing debts. A 28-page ministerial statement, the 1979 Korf report, and an earlier, unpublished Ministry of Mines report make a disastrous picture.

The story begins in 1972, with TIKA's registration soon after Marshal Tito, the late Yugoslav leader, visited Zambia, giving rise to speculation that the company name was an acronym of the first two letters of the names of Marshal Tito and President Kenneth Kaunda of Zambia.

The next year the Government decided to go ahead with a 200,000-ton-a-year integrated

village in North-Western Province, in the triangle of territory formed by Angola in the west and Zaire to the north. The ruling United National Independence Party took 80 per cent of the kwacha 1 million equity, and the Yugoslav company Energoprojekt held the balance.

Zambia's governor and back in that role since last year. Nothing seems to have gone

right. Even since independence in 1964, Zambia had wanted a steel plant but several studies, including one by W.S. Atkins and Partners (U.K.), concluded it would be uneconomic. Yet the Kwacha 50 million contract - impossibly low

"...there has never before been a comparable project in the world with such an accumulation on negative factors..."

The chairman of the board of directors was Mr. Humphrey Mulemba, a member of the party's central committee, who comes from north-western province. Other directors included Mr. Daniel Lisulo, Zambia's Prime Minister until February, and Mr. Bitwell Kuwani, then Bank of

the list were given as: The British

companies Wm. Sanderson and

Son Ltd., and the Wellman

Engineering Corp. Ltd., the U.S.

and Pearlson Engineering Inc. and

the Taiwan-based An-Kou

as it turned out - was signed with Energoprojekt by Mr. Mulemba. now secretary-general of the ruling party and number two to President Kaunda, before a feasibility study had been completed.

It was the beginning of a costly, ill-founded exercise. It transpired that the ore bodies at Chisasa are, in several experts' opinion, inadequate to support the steel plant. Forecasts of Zambian consumption were far too high, and the price of naphtha - a key ingredient in the steel process -soared after the 1974 oil crisis. The cost of TIKA steel, had production begun in 1979, would have been \$618 a ton, double the world price that year. The cost of the plant rose from \$80 million in

November 1976. Proper account had not been taken of the massive infrastructural costs for Chisasa. It is 170 miles from the nearest railscratch, all of which would have

Some of this information was available to TIKA directors at an early stage. In June, 1974, a report by the state-owned Mineral Development Company (Mindeco) raised doubts about the ore body at Chisasa, the use of naphtha and the unrealistic costing of the project. It suggested alternative sites.

Nevertheless, in addition to the initial turnkey contract, some 15 contracts were signed by the board between the second half of 1974 and mid-1977.

The project was assigned to three major firms. Apart from Energoprojekt, they were Mannesmann Demag of West Ger-many, and Pullman Swindell of the United States.

Towards the end of 1974. Energoprojekt withdrew, for reasons not entirely clear, and the Zambian Government took up its 20 per cent of the equity.

In early 1975, TIKA signed an overall consultancy agreement with Swindell Dressier, and later in the year signed a financial deal with the West German institutions. This was followed by a May 1977 agreement between TIKA and Banque Bruxelles Lambert of Brussels to finance a supply contract, signed at the same time, with Soberi, another Belgian bank.

The main Demag contract --worth DM184 million (\$87 million) -- was signed in August 1974 for equipment for electric steel making, continuous casting and rolling mill plants. This was followed by a supplementary agreement in July 1975, and the Zambia Ministry of Mines report says the contract was 70 per cent completed.

Mr. Mumbuna plans to visit Europe and the United States soon to meet creditors and determine the exact obligations.

In order to stabilise market

Saudis keep oil gushing

RIYADH, April 17 (R) — To try enough to meet financial targe to stabilise the world oil market, while Western bankers in Rivac Saudi Arabia is producing oil at a predict a 1981 Saudi Arabian su rate far in excess of what it needs to meet even its own lavish financial goals, according to diplomats and oil sources in the kingdom.

The sources say the Saudis want to ensure that supply is adequate to meet demand, thereby preventing sharp price rises, but the kingdom faces criticism from pricing "hawks" within OPEC (the Organisation of Petroleum Exporting Countries) and its policy, seen as pro-Western, has been questioned at home.

Iran since the Gulf war began last September, Saudi production has averaged more than 10 million barrels a day (b/d) or about onetenth of all the non-communist

world's oil.

plus of around \$50 billion.

They add, however, that t royal Saudi rulers are aware th any sharp cut in the flow of Sat oil would cause panic buyir drive up prices and plunge t West deeper into recession.

This would endanger Sau foreign assets now worth at lea \$100 billion. And it would prol ably retard progress of a 1981-8 third five-year-plan to create gas-based petrochemical industr To offset lost output by Iraq and and use desalmated sea water t develop agriculture, so freeing th economy from almost tot. reliance on crude oil exports.

Saudi oil policy is determine by a supreme petroleum count under Crown Prince Fahd, who U.S. officials calculate that only in day-to-day charge of go half this volume would earn ernment under king Khaled.

Chinese put 'take-away' food on a massive scale

PEKING, April 17 (A.P.) - China soon will be exporting Chines food-to-go, and authentic dishes like pork-and-hot-peppers will be packed in plastic pouches.

The official Xinhua News Agency reported that Peking's fooc industry research institute has developed a flexible plastic food pouch that makes export possible.

Thirty kinds of dishes can be packaged in the pouches and Hong Kong businessmen already have placed orders, it said. A factory is being set up and by the end of the year it is expected to

turn out 2,000 pouches a day. Xinhua said the pouches are made of plastic film and aluminium foil and weigh only one-third as much as a metal can.

Food companies from Japan, the United States and the Middle East already have made inquiries.

The menu includes stewed beef, shredded beef, grilled pork and assorted vegetable dishes. The variety will be increased and even will include soup, Xinhua said.

Greater success in treating leukemia

Dr. Ray Powels, head of the deskemia unit at the Royal Marsden Hospital.

By John Newell

Ve sca antence. Today, new drug treatments have made it possible to the theure between a third and a half of table all cases of childhood leukemia. and the success rate for the treatto a ment of some forms of adult 'leukemia has also improved.

In both adults and children some forms of leukemia continue respond badly to conventional reatment. But two bone marrow ronsplant techniques are now giving hope of a considerable improvement in the success rates or some of these leukemias.

One of the techniques involves replacing the patient's own bone marrow with a graft from a close relative. The other technique involves replacing the marrow with some of the patient's own hone marrow, which has been stored for a while in deep freeze thile the patient undergoes regunent.

The success rates of both emproved by two recent British invelopments -- the use of the grain A, and of so-called minute mal antibodies.

surrow grafting -- taking a graft hen conventional treatment anti-cancer drugs and radinon fails to kill all the leukemic -us in a patient's body, it is somemer possible to kill them all by Restaut, apping up the doses. This higher losage, however, also kills the

> entiont's bone marrow. Anti-cancer drugs and radiation theet all fast-dividing tissues as well as cancer cells, and bone marnov is the most vulnerable such missue. Leukemia is a cancer of the bone marrow cells that form new white blood cells. When

would be unable to make new called monoclonal antibodies. blood cells. But if they are given a graft of a relative's bone marrow, by transfusion into a vein, then the graft will grow and spread to reconstitute their own bone mar-

Since the leukemic cells in the patient's own bone marrow are killed and replaced with healthy bone marrow which forms new white cells, this technique can cure

The limitation on this allogeneic graft technique, as it is called, is the graft-versus-host reaction. This is the reaction of the grafted bone marrow against the foreign tissue into which it is implanted. The reaction is so strong that only very closely matched bone marrow has been successfully used for such grafts. A brother or sister of the patient has only a one-in-four chance of being a compatible

But new work by Dr. Ray Powles, head of the leukemia unit at the Royal Marsden Hospital, in the southern suburbs of London, gives strong hope of widening the scope for allogeneic bone marrow grafting. Dr. Powles has been using the new immunosuppressive drug Cyclosporin A, first used on man at the Marsden for bone marrow and, later, kidney transplants, to suppress the graft-versus-host

This is making it possible to use less well matched donors to provide bone marrow for leukemic patients. There may be further complications, such as a reduction of the patient's natural resistance caused by the drug. But allogeneic bone marrow grafting with the use of Cyclosporin A seems bound to widen considerably the scope for leukemia treatment by this

The other grafting technique, known as autologous grafting, the hariques are now being once again involves giving the patient very heavy drug treatment and radiation to provide the best the chance of killing all the leukemic cells -- and at the same time killing his or her bone marrow. Before The idea behind allogeneic the treatment is given, however, a sample of the patient's own bone marrow is taken and kept in deep freeze.

> After treatment it is grafted back into the patient. The snag is that the frozen marrow usually contains some leukemic cells so that usually, sooner or later, the patient again develops the disease.

> Until recently there has been no technique that offered any real hope of removing leukemic cells from such stored bone marrow.

> But in the last few years Dr. Caesar Milstein of the Cambridge Molecular Biology laboratory, in eastern England, has invented a

troyed, they would normally die of very large quantities of antiwithin a week or two because they bodies of any kind. These are

> A team at the Royal Free Hospital in London, led by Dr. Grant Prentice, has shown that by making monoclonal antibodies to leukemic cells, attaching the antibodies to beads, packing a glass tube with the beads and trickling the bone marrow through the tube, it is possible to remove up to 98% of the leukemic cells from marrow to be used for autologous

> grafting.
> Used in conjunction with a new drug, Deoxycoformycin, which kills the leukaemic cells selectively, this technique apparently can remove leukemic cells so effectively that there is a good chance the patient will not develop leukemia when his bone marrow is reimplanted.

This technique is also being used for the treatment of some other forms of cancer, including breast and lung cancers. The patient is treated with very heavy drugs and radiation to try to kill the cancer. The treatment also kills his bone marrow, but this is reconstituted with a quantity of his own marrow, taken and stored before treatment began, and treated with antibodies to remove

These techniques are very new and it is impossible to say how great their long-term value will be. But there is no doubt that new developments such as Cyclosporin A and monoclonal antibodies are going to improve the success rate in treating leukemia, and other forms of cancer.

any cancerous cells that may be

The masters go underground in Munich

MUNICH — The city fathers of Munich have hit upon an excellent idea for adorning the walls of the "conigsplatz underground station in Bavaria's capital. Instead of the conventional string of ments, travellers in the station will be able to feast their eyes on reproductions of celebrated masters, cast on easy-to-maintain enamel tiles. There's a catch of sorts, to be sure. All the reproductions to be shown can be seen in the original state at the numerous museums and art collections in the city, a tribute to the city's cultural abundance and an invitation to the passerby to take the time-sometime-to see these treasures. Among the most impressive of these scaled-down reproductions is the world-famous "The Blue Horses" by Franz Marc (see photo), who was born in Munich in 1880 and figured prominently in the Munich artist group known as "The Blue Rider". He died on the battlefields of Verdum in 1916. It was the "Blue Rider" school which helped Expressionism make its breakthrough in pre-World War One Germany.

Brazilia

cars

By Peter Millership

RIO DE JANEIRO - Signs outside Brazilian filling stations say "we sell alcohol" and drivers queue to fill up with it.

To cut crippling oil import bills and make petrol go further. Brazil uses alcohol brewed from sugar cane grown on vast plantations.

The programme has been vigorously pushed for five years with the result that ears are now coming onto the roads sporting badges. that declare they are powered by alcohol. Others use gasohol, a mixture of alcohol and petrol.

Energy experts have serious doubts, however, about how workable an alcohol or gasohol. scheme would be in other countries which might try to follow Brazil's lead. Few have the available land.

Brazil is so enormous that only two per cent of its land area would suffice to produce enough alcohol to replace all present oil imports. That two per cent of Brazil, however, is an area about the size of the whole of continental Portugal.

France announced plans in January to use gasohol from agricultural products half the amount of imported oil used in transport during the 1980s. But the French sugar beet association called the scheme ambitious.

In the United States experts have voiced doubt about plans to produce enough gasohol to substitute for 10 per cent of U.S. perrol consumption by 1990.

"U.S. gasohol sales are static

WORLD NEWS BRIEFS

Calvary reenactments in Philippines

MANDALUYONG, Philippines, April 17 (A.P.) — A Filipino labourer was nailed to a cross atop a rocky hill today; fulfilling an Easter yow to crucify himself in hopes of meeting a former American World War II soldier he said was his father. Reenacting Jesus Christ's crucifixion on Mount Calvary 2,000 years ago, Mr. Donald Rexford Jr., 34, was impaled on the wooden cross before a crowd of 2,000 people, mostly women and children, in this castern suburb of Manila. In two other Philippine towns, four men and a woman were also nailed to crosses, in what has become a major tourist attraction. Officials of San Frando, 48 km north of Manila, estimated 20,000 people watched as, for the first time, three men were hoisted up on crosses atop a hill in a rice field. Before he was crucified Mr. Rexford dragged the 40-kilo cross on his shoulders in a nine-hour, barefoot march through four towns, while friends dressed like Roman centurions lashed his back with leather and bamboo whips.

Pope and clerics renew celibacy vows

VATICAN CITY, April 17 (A.P.) — Nearly 1,600 priests, bishops and cardinals renewed their vows of celibacy together with Pope John Paul II yesterday as the pontiff opened four days of Easter celebrations with a mass in St. Peter's Basilica. Twentyfive Rome-based cardinals, 43 bishops and 1,500 priests, all from the Rome diocese celebrated the mass with the pontiff before the huge canopied main altar. The mass preceded a major ceremony at the Basilica of St. John Lateran later in the day in which the Pope washed the feet of 12 poor old men living in nursing homes in a re-enactment of the Last Supper of Jesus and his desciples. The services opened four days of Easter celebrations which have attracted hundreds of thousands of tourists to the eternal city. The Pope, wearing purple and white vestments, told a crowd of 15,000 to pray for those priests "who had broken their faithful alliance with the Lord." The pope did not elaborate, but Italian sources at the Vatican said he referred to those Roman Catholic clerics who had left the priesthood.

'Go home' slogans greet Charles

MELBOURNE, Australia, April 17 (A.P.) - Students shouting "Go home Charlie, greeted the heir to the British throne yesterday on his first visit here. The demonstrators, protesting the university's granting of an honorary law degree to the prince, shouted slogans and yelled "We don't need the monarchy" as the prince stepped out of the royal limousine. There were no injuries and heavy security had everything under control. A smaller crowd of agitators waited outside the administration building as the prince left the building. More than 40 uniformed and plain clothes police formed a cordon around him to protect him. Earlier plans for Prince Charles to meet and talk with graduates and their parents had to be shelved because of the security risk. Before the prince arrived, a male student wearing an aluminium foil crown handed out mock degrees to the crowd. Meanwhile, a female student clad in a wedding dress also waited outside the building. But the prince apparently did not even see her. Mr. David Bloom, vice-president of the Australian Liberal Students Federation, said the demonstrators did "represent the feeling of the majority of

Salvadorean slavings suspect held in U.S.

MIAMI BEACH, April 17 (A.P.) — A Salvadorean sought in connection with three slayings in that country, two of them of Americans, has been arrested here at the request of El Salvador's government, the State Department says. Two Americans and a Salvadorean were killed in the January shooting. The Americans

- Mr. Michael Hammer, 42, and Mr. Mark Pearlman, 26, -- were advisers to El Salvador's controversial agrarian reform programme. Also killed was Mr. Rodolfo Viera, 43, a peasant union leader and head of the agrarian reform institute. The slavings occurred just a month after four American church women were killed in El Salvador. No arrests have been made in that case. FBI agents arrested Mr. Hans Christ, 30, on Wednesday in Miami Beach and took him to the Dade County jail to await a bond hearing scheduled for today, officials said.

'October '80' surfaces in Greece

ATHENS, April 17 (R) - An underground organisation calling itself "October 80" has claimed responsibility for six bomb blasts late Wednesday which caused extensive damage to cars belonging to foreign companies established in Greece, a police spokesman said. The group distributed leaflets saying it was protesting against the high cost of living. Inflation has been running at about 25 per cent of three consecutive years. The spokesman said two of the bombs were placed under cars belonging to two pharmaceutical companies and the third under a car belonging to a Saudi Arabian businessman. The other three damaged cars belonged to Greeks, he added. The same group claimed responsibility for bomb blasts which set alight and gutted two of the largest department stores in Athens last December.

Tax protestors turn White House red

WASHINGTON, April 17 (R) - Seven men and three women are arrested on the White House lawn Wednesday after splashing a red liquid on three pillars of the mansion's north portico, officials said. White House spokesman Larry Speakes said the 10. apparently members of a pacifist organisation, were not armed and were not regarded as a threat to President Reagan, who was in the mansion recovering from a bullet wound sustained during an assassination attempt on March 30. A Secret Service spokesman said the group, who were among tourists walking through the public rooms of the White House, threw the liquid from baby bottles and then knelt on the lawn and prayed. Found nearby were income tax forms -- Wednesday was the last day for submitting 1980 tax returns to the internal revenue service - and pamphlets criticising Mr. Reagan's proposed budget cuts and policy in El Salvador. The pamphlets carried the imprint of "The Atlantic Life Community," an anti-nuclear pacifist group. A spokesman for the National Park Service, which maintains the White House grounds, said the liquid coagulated and was presumably blood. In its first reports of the incident, the Secret Service said nine men had been taken into custody.

Corsica bomb blast victim dies in hospital

MARSEILLES, April 17 (R) — A young Swiss tourist injured in a bomb blast at the Corsican airport of Ajaccio yesterday died early today, hospital officials in Marseilles said. Mr. Peter Hitz, 19, who came from the Grisons Canton, suffered skull injuries when two bombs exploded in the airport terminal building as President Valery Giscard d'Estaing flew in for an election rally. Seven other people, including two Swiss tourists, were hurt and. taken to a local hospital. No-one has yet claimed responsibility for

prisoners, who began refusing

for the hunger strikers.

WEST BERLIN, April 17 (R) — Explosions went off in West Berlin and leftist demonstrators took to the streets in other West German cities last night after the death of a jailed hunger striker, police said

The death of Mr. Sigurd Debus yesterday after a 10-week fast in a Hamburg prison was followed by five explosions as well as other violent incidents in West Berlin.

In Hamburg and Frankfurt, windows were shattered when hundreds of Debus supporters demonstrated in the streets, a police spokesman said. Some Frankfurt demonstrators threw stones at police.

In Osnabrueck, 30 young people occupied a church and hung a banner above the altar with the words: "Hunger Strike -- you too are responsible for the death." Their leaflets said the authorities had known Mr. Debus might die.

In jails around the country 38 leftists broke off their coordinated hunger strike within hours of the news of their comrade's death.

In West Berlin, an explosion caused 10,000 marks (\$5,000) damage at the Max Planck educational research institute.

West Berlin police said that in other blasts, one of them at a courthouse, damage was slight. But windows were smashed in shops, banks and business offices.

Police detained one young man who threw paint at their car. But they said violence during the night was much less widespread than they had feared in a city which has witnessed numerous bloody clashes in pro-squatter demonstrations during the past few

The hunger strikers, who were demanding prisoner of war status, ended their fast in view of what they said was the prospect of better conditions of custody.

We have decided to break off the hunger strike now that we can assume, after two interventions by Amnesty International, that no prisoner will be isolated in solitary again and several groups of prisoners will be formed," the prismers said in a statement issued by Mr. Debus's lawyer, Mr. Peter

food in early February, were connected with the anarchist "Red Army faction" or its offshoots.

In West Berlin, the city justice ministry said moves had begun towards easing conditions in the top-security wing at Moabit jail where 11 urban guerrillas are

These are to include a tearoom, a gymnasium, a lawn in the courtvard and an extension from two hours to 10 of the time they can spend in small groups every day in each other's cells.

Six of the hunger strikers are in Moabit--five women and one man, Mr. Andreas Vogel, who has now agreed to resume medical treatment he had refused after being returned to jail two days ago from a city clinic, a justice ministry spokesman said.

Mrs. Thatcher defends Pakistan's rearmament

'NEW DELHI, April 17 (R) - British Prime Minister Margaret Thatcher today defended Pakistan's right to rearm itself because of what she called the Soviet occupation of Afghanistan.

Speaking after two days of talks with Prime Minister Indira Gandhi and other Indian leaders, she said she would convey to President Ronald Reagan India's concern over U.S. plans to supply arms to

But she told a press conference that India itself had increased its armaments enormously and: "One cannot ask for the right to defend oneself and deny that right to other sovereign nations".

Mrs. Thatcher, who later flew to Bombay and starts a one-week tour of the Gulf on Sunday, said that if the United States created a rapid deployment force, Britain would wish "to make a small con-

She said there had been no suggestion that the proposed force should be stationed in the Gulf, adding that it would not be deployed 'except at the request of nations."

Mrs. Thatcher said her talks with Mrs. Gandhi had been characterised by mutual regard and great understanding. But her comments today highlighted differences with the Indian leader, who has expressed serious misgivings about western defence strategy in the region. Questions on the rearming of Pakistan dominated the 35-minute press conference, with Mrs. Thatcher repeatedly asserting the right of each nation to defend itself.

She said she had conveyed to Mrs. Gandhi a message of friendship from Pakistan's President Mohammad Zia-ul-Haq who the British Foreign Secretary, Lord Carrington, met in Islamabad last month. sed whether she thought her visit to India would help improve relations on the sub-continent, she replied: "I would not say that it would make a great deal of difference."

Kabul demands return of tank

ISLAMABAD, April 17 (R) -The Afghan government has asked Pakistan to return as Soviet-built T-54 tank on which a junior officer of the Afghan army crossed into Pakistan last week, Pakistani Foreign Minister Agha Shahi said today.

The Afghan officer, Lt. Nazar Mohammad, 21, drove into Pakistan's Baluchistan Province with the tank last Saturday, seeking political asylum.

Reports in some Pakistani wspapers said yesterday that the Pakistan government had decided to return the tank if a request was received from the Afghan government.

Mr. Shahi called the press

reports speculation and said the request would be "considered and examined" before a decision was

Official sources said no decision had been taken on the defector's request for asylum.

Blacks call off Sunday rally in south London

LONDON, April 17 (R) — Black community leaders in the multiracial South London district of Brixton which was torn by violent riots last weekend have called off a mass rally planned in the area for

Guyanan-born lawyer Rudy Narayan, chairman of the Brixton Defence Committee set up to represent 207 people arrested in the riots, said local residents were anxious not to act against the public interest.

Mr. Narayan said some outsiders were more anxious than local people to hold a march.

"We are not willing to be used by people from outside the community," he said.

Police, against whom much of the rioting by mainly black youths was aimed, have been concerned at plans for a rally, saying it could cause further trouble.

London's police chief, Sir David Mcnee, has said outside agitators may have instigated the violence. looting and arson in Brixton although community leaders have blamed heavy-handed policing and high unemployment.

Opel Ascona takes early lead in Ken Safari

NAIROBI, April 17 (R) — West German Anders Kullang, dring an Opel Ascona 400, snatched the early lead in the demandial Kenya Safari Motor Rally today. At Kisumu, a control point the first leg of the 5,000-kilometre world championship eve . Kullang had 11 minutes time penalties-one fewer than his near it rival Timo Salonen of Finland in a Datsun 110. A point furni adrift was the Peugeot 504 coupe of Frenchman Guy Frequel
Another Peugeot driven by Finland's Timo Makinen had ek trical problems before continuing to Kisumu in joint fourth la * with compatriot Rauno Aaltonen's Datsun Violet Gt. Just befo the rally got underway the 70 cars were diverted from the origin rutted bush track to an all-weather tarmac road because of hea rain. But as the cars moved from Kisumu to the north, close to t Kenya-Uganda border, they were forced back on to rough bu tracks, which, coupled with the heavy rain, was expected to gi the drivers a demanding time.

The NASL-USSF feud over soccer rule

NEW YORK, April 17 (R) — A simmering feud between t North American Soccer League (NASL) and the United Stat Soccer Federation (USSF) has added more confusion to a dispu about NASL's rules of play. A day after the International Footh: Association (FIFA) President Joao Havelange denied havir authorised the NASL to revert to its own offside and substitute rules, NASL Commissioner Phil Woosnam accused the USSF thwarting league attempts to arrange a meeting with FIFA. 1 discuss the issue. Mr. Woosnam's statement was in reply to a earlier comment by USSF President Gene Edwards that M Woosnam had misinterpreted the contents of a letter to the USS from Mr. Havelange. By protocol, the NASL cannot deal directly with FIFA, but only through the USSF, which governs soccer i America as a FIFA affiliate. The dispute began last Decembo when FIFA ordered the NASL to conform to international rule on offside and substitutions, a limit to two per game, or facsuspension from organised soccer. The NASL had been using three-substitutions-per-game rule since 1967, and a 35-yea offside rule since 1975. A suspension by FIFA would bar NASi. teams from playing foreign opposition and would also prever overseas players with NASL teams from playing for their nation:

Police plan protest in path of Bostor marathon

BOSTON, April 17 (A.P.) - Boston police angry over layoffs o 200 officers because of city budget problems have decided to hold a protest meeting in the path of the Boston marathon next week the head of a patrolman's association said. "If all the people we expect show up at the meeting, it will be tough for the runners to get by," said Chester J. Broderick, chairman of the Boston Police Patrolmen's Association. He said police would meet at noor Monday at Cleveland Circle, about 11 km from the finish line o the celebrated 41-km race. "A large group at Cleveland Circle certainly would disrupt the marathon," he said. Mr. Ben Kilgore a spokesman for Mayor Kevin H. White, said he had no comment on the association's plan. There was no immediate comment from officials of the Boston marathon. "The association feels strongly the marathon should not be held in this city, Mr. Broderick added." The police officers left to cover such functions, because of the shortage of police, will be forced to work double shifts, and since many of them are 50 to 55 years old, they will be subject to heart attacks and other serious ailments." The city last Friday laid off 200 officers because of budget problems.

Zimbabwe celebrates first anniversary

A nation that never looked back

By John Edlin

SALISBURY, Zimbabwe — Zimbabwe's first year of independence and black rule has moved the nation only a short way toward economic independence.

In a year of independence however, the economy has picked up,

the country is poised to become an exporter of food to other black nations in southern Africa, and while whites have left, there has not been the wholesale exodus which some feared. A year ago today, former guerrilla leader Robert Mugabe

watched proudly as the mul-ticolour flag of the new nation of Zimbabwe was raised over a Salisbury soccer stadium, symbolically ending nine decades of white rule on what was the British colony of Rhodesia.

Across town in the bar of the Chalet Hotel, grim whites who fought in the seven-year war brooded over their future.

Mr. Mugabe, according to supporters of white former prime minister Ian Smith, was a Marxist

Potentially a rich nation, Zim- terrorist who would seize the babwe remains dependent on whites land, homes, jobs and foreign assistance for develop- bank accounts, the economy ment, and on white-ruled South would be destroyed and the more Africa as its main doorway for than 200,000 whites would be forced to flee to other lands.

Some feared civil war between, the rival guerrilla armies and the Zimbabwe African National Liberation Army (ZANLA), drawn from Mr. Mugabe's dominant Shona tribe, and the Zimbabwe People's Revolutionary Army (ZIPRA), mostly of tribesmen of the minority Matebele people of Mr. Joshua Nkomo, junior partner in Mr. Mugabe's coalition government.

A year later, the whites still gather for their sundowners at the Chalet. They still have their houses, savings and jobs.

A record 17,240 people, mostly whites, emigrated during 1980. but 6,407 new settlers arrived. Most of the 36,000 guerrillas have been disarmed and integrated into a new national army.

"Peace and reconciliation have replaced war, racial hatred and

Birth of a nation. Zimbabwean flag going up on April 18, 1980

*Peace and reconciliation have replaced war, racial hatred and confrontation'

confrontation," President Canaan Banana said in an interview. "All our people, not withstanding the racial and ethnic heterogenity. have accepted to live together as Zimbabweans, united by the common desire to rebuild and develop our beautiful country."

Much rebuilding has been done. Exports of minerals, cotton. tobacco, maize, sugar and other commodities have increased from \$1 billion (702 million Zimbabwe dollars) in 1979, the last year of the war, to \$1.4 billion (900 million Zimbabwe dollars).

More than one million war refugees are being resettled, some 2,000 black farmers have bought unused farmland once owned by whites, and engineers and carpenters are busy building bridges. railroads and schools. At least 144 of the 247 bospitals and clinics forced to close during the war have been reopened.

Government planners say the full cost of building a healthy economy will be \$6 billion. Last month, Zimbabwe raised \$1.8 billion in aid pledges, mostly from

western nations, at an unusual international donors' conference. Mr. Mugabe, the son of a peas-

ant farmer, has kept pre-election promises of social reforms for Zimbabwe's more than seven million people, four-fifths of them poor rural farmers.

Mugabe has boosted government revenues to provide for the first time, free primary education for all children and free health care for citizens earning less than 150 Zimbabwe dollars (\$232) a

He has also fixed a minimum monthly wage to double the average paid under the former white rulers and spent 120 million Zimbabwe dollars (\$186 million) to subsidise essential foodstuffs.

Under previous governments education was compulsory for the whites. The best hospitals were reserved exclusively for whites, and blacks were paid as little as 20 Zimbabwe dollars (\$23) a month).

The increased spending power has caused nationwide shortages of butter, cheese and meat. The monthly minimum wage of 85 Zimbabwe dollars (\$132) for city workers has lured many labourers from the 5,700 white-owned farms that produce most of the country's food and generate most

inflation is expected to race well beyond last year's 15 per cent. Those are not the only minuses on Zimbabwe's first annual bal-

of its export sales. Heftier wage

bills have forced some man-

ufacturers out of business, and

ance sheet: -- At least 500 people were slain in the year since independence. usually in fighting between rival guerrillas and their militant supporters. Most of the 26 cabinet ministers move around Salisbury with armed bodyguards.

-- Some 5,000 armed guerrillas loyal to Mr. Nkomo remain dug in at Gwaai River, an abandoned copper mine in western Zimbabwe, refuse to give up their weapons and threaten to fight it out with anti-aircraft batteries. SAM-7 ground-to-air missiles. light and heavy machine guns unless they are given key posts in the new army.

Mr. Nkomo remains embittered that he lost the pre-independence elections in February 1980, Some By spurring growth in private of his militants urge him to quit the industry and agriculture. Mr. coalition government in which Mr.
